

MineShield Project — Color Palette Specification

Document Reference: docs/color-palette.pdf

Theme: High-Visibility Light Mode (Production Verified)

1. BASE SURFACE & CANVAS PALETTE

Global Screen Canvas Background

HEX: #F4F7FA

Application: Complete application canvas, login backdrop, and layout background.

Module Container Surface

HEX: #FFFFFF

Application: Quad-grid statistic modules, telemetry blocks, profile card lists, and navigation islands.

Structural Stroke Lines & Dividers

HEX: #E2E8F0

Application: Inactive input borders, card outlines, and item list separators.

2. BRAND IDENTITY ACCENTS

Primary Safety Orange

HEX: #E88D43 / #FA8100

Application: Active tab highlights, main action button fills (e.g., "Save Account Changes"), and quad-grid boundary definitions.

3. SEMANTIC ALERT STATUS HIERARCHY

Critical Alert / Evacuation State

HEX: #D46B5A (Soft Fill) | #C63A27 (Text & Progress Indicators)

Application: Critical zone banners, "EVACUATING" badges, threat progress meters, and structural stress alarms.

Warning / Pending State

HEX: #FDF2E2 (Soft Fill) | #D97706 (Text & Badges)

Application: Active Hazard indicator grids, Methane/Gas threshold tracking panels, and live non-SOS logs.

Nominal / Safe State

HEX: #EAF7F0 (Soft Fill) | #2E7D32 (Text & "ON-DUTY" Badges)

Application: "Resolved Today" tracker panels, clear safety status cards, and live on-duty team rosters.

4. SYSTEM CONTRAST TYPOGRAPHY

Primary Text Header Navy

HEX: #1E2E4A

Application: Main page headers, structural labels, alphanumeric logging IDs, and bold metrics values.

Secondary Text Slate Gray

HEX: #64748B

Application: Explanatory card texts, physical addresses, sensor sub-labels, and tracking status parameters.
